The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

The disclosure is objected to because of the following informalities: the last phrase of claims 1 and 2 respectively appears redundant: "...connected to the output terminal of said operational amplifier coupled to the output terminal of said operational amplifier". Additionally, fig. 12 should be labeled as --prior art--.

Appropriate correction is required.

This application is in condition for allowance except for the following formal matters:

as above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the angular rate sensor of Nozoe et al., fig. 1 of which may be read on claim 5 except for the details of the second amplifier claimed.
